

## **“My teeth feel fine. Do I still need to see a dentist?”**

**March 20th, 2012**

Simply put, yes! Visiting the dentist on a regular basis is essential to keeping your smile in tip-top shape. At [Sone's On Sheppard Dental Centre](#), we offer a number of preventive services to ensure the health of your mouth and the beauty of your teeth. We'd like to think that your smile is just as important to us as it is to you!

Another good reason to visit [Dr. Warren Sone](#), [Dr. Eryn Sone](#) and [Dr. Aiden Sone](#) every six months is to check for “hidden” problems you may not even realize you have. Tiny cavities can form in the hard-to-reach areas of your teeth and may only be found through a professional exam. If left untreated, these cavities can get worse, needing more extensive treatment, and costing you even more time and money. During your routine exam, your hygienist will also check to make sure your fillings or other dental restorations are in good shape.

If it has been more than six months since your last visit to our [Toronto](#) office, please give us a call! We look forward to your next visit!

# Dr. Aiden Sone and Dr. Eryn Sone can help you decide if dental implants are right for you

**March 24th, 2012**

If you have missing teeth, it is crucial to replace them. Without all your teeth, chewing and eating can destabilize your bite and cause you discomfort. Dental implants are a great option for replacing missing or badly diseased teeth. A dental implant offers comfort, support, stability, and is as close to a natural tooth that a restoration can be.

There are many benefits to dental implants:

- Dental implants restore your ability to chew food properly.

- They fill out a face that may otherwise look sunken in because of missing teeth.

- They don't need to be removed for overnight cleaning and soaking.

- No adhesives are needed.

- You'll feel more confident to show off your smile to the world.

- Each implant is created to fit in perfectly with the look of the rest of your teeth.

At Sone's On Sheppard Dental Centre, we can provide you with the smile and function you want from start to finish. Please contact us to discuss your treatment options.
